

PHASE 2 – Creating a Custom Table and Fields

Employee Raise Issue – Record Producer & Service Portal Integration

1. Objective

Create the Employee Raise Issue table and define the fields required to store employee-raised issues with structured choices and reference fields.

2. Create the Table

Step 1: Navigate to Tables under System Definition.

Step 2: Click New on the top-right corner.

Step 3: Set Label to Employee raises issue.

Step 4: The Name field is auto-populated.

Step 5: Under Controls, enable Auto number.

Step 6: Save the form from the context menu.

Step 7: Under Related Links, click Show Form.

Step 8: Open the context menu and select Configure → Form Design.

Step 9: Create the required fields with the names and types listed below.

Employee raises issue table creation

servicenow All Favorites History Workspaces Table - Employee raises issue Application scope: Employee Center Update set: Default (Employee Center)

< Table Employee raises issue Delete Update Delete All Records

A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table. Applications use tables and records to manage data and processes. [More Info](#)
