

PHASE 4 – Creating a Record Producer

Employee Raise Issue – Record Producer & Service Portal Integration

1. Objective

Create a Record Producer that allows users to submit Employee Raise Issue requests through the Service Portal. The Record Producer maps user inputs to the Employee Raise Issue table.

2. Record Producer Configuration

Step 1: Navigate to All menus → Service Catalog → Catalog Definition → Record Producers.

Step 2: Click New.

Step 3: Set Name = Raise Employee Issue.

Step 4: Set Table = Employee Raise Issue.

Step 5: Enter a suitable description in What it will contain.

Step 6: Under Accessibility, select Catalog = Service Catalog.

Step 7: Select Category = Service.

Step 8: Add an image in the Picture field.

Step 9: Give the Meta name as the table name.

Step 10: Save the form.

Record Producer main configuration

The screenshot shows the ServiceNow interface for configuring a Record Producer. The top navigation bar includes 'servicenow', 'All', 'Favorites', 'History', 'Workspaces', and a search bar. The main header displays 'Record Producer - Raise Employee Issue' with a star icon. Below this, the configuration form is visible. The 'Name' field is set to 'Raise Employee Issue'. The 'Table name' field is set to 'Employee raises issue [x_1955238_em...'. The 'State' and 'Checked out' fields are both set to '-- None --'. The 'Owner' field is set to 'System Administrator'. The 'Application' dropdown is set to 'Employee Center'. The 'Active' checkbox is checked. The 'What it will contain' tab is selected, showing a text area for 'Add a short description and a full description'. The 'Short description' field is currently empty.

3. Create Variables

Step 1: Under Related Links, open the Variable section and click New.

Step 2: Choose the variable type based on the Employee Raise Issue table field.

Step 3: Enable Map to Field.

Step 4: Choose the target Field and Type.

Step 5: Set variable Order values such as 100, 200, 300, etc.

Step 6: In the Question section, enter the question. The Name is populated automatically.

Step 7: Create and save the five variables.

Variable	Type	Notes
What is the Requester name	Reference	sys_user
Which Category	Choice	Network, Software, Hardware, Access
What is Subcategory	Choice	VPN, Laptop, Server, Forgot password
Which State is this issue	Choice	New, In progress, Resolved, Closed
Short description	Single line text	String

Raise Employee Issue

I am currently experiencing frequent network connectivity issues while using my office system. The network connection becomes unstable several times during working hours, causing slow internet speed, unexpected disconnections, and difficulty accessing important company resources. Due to this issue, I am unable to work efficiently and complete my assigned tasks within the expected time.

what is the Requester name

Which Category

☒ Access

☐ Hardware

☐ Network

5. Expected Result

Employees can use the Raise Employee Issue Record Producer to enter issue details, which are mapped to the Employee Raise Issue table.
