

PHASE 5 – Creating a New Service Portal

Employee Raise Issue – Record Producer & Service Portal Integration

1. Objective

Create a dedicated Service Portal where employees can access the Raise Employee Issue Record Producer through a user-friendly interface.

2. Create the Service Portal

Step 1: Navigate to Service Portal Configuration under Service Portal.

Step 2: Click New.

Step 3: Set Title = Requesting portal.

Step 4: Set URL suffix = employee_request.

Step 5: Set Homepage = ec_standard_home.

Step 6: Set KB home page = esc_knowledge_home.

Step 7: Set Login page = login.

Step 8: Upload a Logo image.

Step 9: Set Main menu = Employee Center Menu.

Step 10: Set 404 Page = 404.

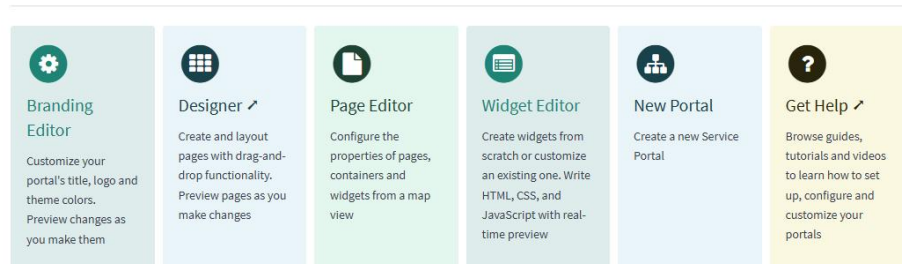

Step 11: Set Theme = Employee Center Coral Theme

Create rich, engaging and modern experiences to help your business run better
Select one of the options below to continue

3. Create Employee Center Portal Page

Step 1: Navigate to All Menu and search for Service Portal.

Step 2: Select Pages and click New.

Step 3: Set Title = Employee Center Portal Page.

Step 4: Set ID = employee_center_portal_page.

Step 5: Save from the context menu.

Employee Center Portal Page configuration

The screenshot displays the configuration interface for the 'Employee Center' application. The top section shows the 'Variable' 'what is the Requester name' being mapped to a 'Reference' type 'Raise Employee Issue' from the 'Catalog Item' table. The 'Order' is set to 100, and the 'Field' is 'Requester'. The 'Record producer table' is 'x_1955276_employ_0_employee_raises_issue'. On the right, there are checkboxes for 'Active' (checked), 'Mandatory', 'Read only', 'Hidden', and 'Disable automatic slot fill based on user context'. Below this, the 'Question' tab is selected, showing a list of questions. The first question is 'what is the Requester name' with the name 'requester'. The 'Conversational label' and 'Tooltip' fields are empty. The bottom of the interface has 'Copy', 'Update', and 'Delete' buttons.

Variable: what is the Requester name

Application: Employee Center

Map to field: ☒

Type: Reference

Catalog Item: Raise Employee Issue

Order: 100

Field: Requester

Record producer table: x_1955276_employ_0_employee_raises_issue

Active: ☒

Mandatory: ☐

Read only: ☐

Hidden: ☐

Disable automatic slot fill based on user context: ☐

Question: what is the Requester name

Name: requester

Conversational label:

Tooltip:

Copy Update Delete

4. Expected Result

A dedicated employee portal and an Employee Center Portal Page are configured for the project.
